Overview

Product description

Keysight Technologies, Inc. has been a leading designer and manufacturer of RF and microwave switches in the global marketplace for more than 60 years. RF and microwave switches are used extensively in microwave test systems for signal routing between instruments and devices under test (DUT).

Keysight designs and manufacturers a comprehensive range of RF and microwave switches to meet your switching requirements. Other than connectorized switches, Keysight also offers switch modules that operate across a broad frequency range and come in a variety of configurations. With Keysight's proven track record in switches (high performance, quality and reliability), these modules will provide a similar set of standards of high accuracy and repeatability for automated test and measurement, signal monitoring and routing applications.

The M9155/6/7C Keysight PXI hybrid switch module series operates from a frequency range of DC to 26.5 GHz. It is being used in applications such as Automatic Test Equipment (ATE), RF communications measurement and RF parametric measurements where a rugged switching module is needed in switching systems.

The PXI hybrid switch module comes in a selection of 3 models; the integration of Keysight dual SPDT switches, dual transfer switches, and a single SP6T configurations. These PXI modules provide an exceptional 0.03 dB insertion loss repeatability, high isolation and low SWR with a long operating life up to 10 million cycles.

Figure 1. Soft front panel for M9155C, M9156C and M9157C

M9155C is an integration of 2 units of Keysight 8765C with Option 024 (24 V, 3 inch ribbon)

M9156C is an integration of 2 units of Keysight L7222C with Option 161 (24 V, 10-pin DIP)

M9157C is an integration of 1 unit of Keysight L7106C with Option 161 (24 V, 16-pin DIP)

Connections are made via front panel mounted high quality RF coaxial connectors, 3.5 mm (f) or SMA (f) for 50 Ω.

The M9155/6/7C switch modules give you the most reliable and repeatable RF & microwave switching available in the market. Their applications are mainly in automated test equipment for example, RF communication, engineering verification and RF parametric measurement where low insertion loss and ultra high isolation are critical.

These modules provide individual cycle count trackings for each of the switch paths. Cycle count is incremented per each complete Open-Close sequence. The individual cycle count is user-retrievable, either via scripting or the Soft Front Panel. Engineers can use this feature for scheduled maintenance to reduce unexpected system downtime.

Hardware platform

Compliance

The M9155/6/7C is PXI compliant, using either a PXI-H, PXI-1 or cPCI slot. Designed to benefit from fast data interfaces, the products can be integrated with other test and automation modules in PXI, CompactPCI, and Hybrid chassis. The PXI format offers high performance in a small, rugged package. It is an ideal deployment platform for many automated test systems. A wide array of complementary PXI products is currently available. Products include multimeters, waveform generators, local oscillators, digitizers, and switch multiplexers.

Software platform

Drivers

Keysight's switches come complete with software drivers for Windows XP, Windows Vista, Windows 7, and LabVIEW. Also included are application code examples for LabVIEW, LabWindows/CVI, Visual Studio, C, C++, MATLAB.

Soft front panel

The M9155/6/7C's graphical user interface guides developers through the module setup process. Users can quickly configure the module parameters. The interfaces are implemented using the IVI standard supporting both IVI-COM and IVI-C.

Easy software integration

Keysight's M9155/6/7C comes complete with software drivers for Windows XP, Windows Vista, Windows 7, and LabVIEW. Also included are application code examples for LabVIEW, LabWindows/CVI, Visual Studio, C, C++, C#, Visual Basic, and MATLAB, which provide M9155/6/7C set up and basic switching functionality. The application code examples are easily modified to quickly integrate the module into your measurement system.
